

FT-2000-CI

PACKER FLUID INHIBITOR

DATA SHEET

GENERAL INFORMATION

FT-2000-CI is an inhibitor containing a bactericide, oxygen scavenger, and corrosion inhibitor. It has been formulated to allow quick solubility in completion fluids. It shows inhibition effects up to 99% in concentrations as low as 0.5% to 1.5% by volume.

ADVANTAGES

- Quick solubility
- Inhibition up to 99%
- Bactericide
- Oxygen scavenger
- Corrosion inhibitor
- Economical

APPLICATION

Typical applications range from a minimum of 0.5% to 1.5% by volume. **FT-2000-CI** is readily soluble in light brines; more agitation time is required in heavier brines to allow total solubility.

SERVICE

A fluid technician is available 24 hours a day to assist in specific recommendations based on actual site conditions. Application techniques that are proven and field tested ensure you receive the best products and service available in the industry.

PACKAGING

Available in 55 gallon drums.
